

Covering the entire infrastructure lifecycle, Quest delivers innovative products in five main areas:

- Active Directory
- Managing Identities and Access
- Unified Communications
- Windows Data Management
- Systems Center
- SharePoint

## Solutions for Windows Management

Get more performance, reliability and productivity from your Microsoft investments with Quest's award-winning infrastructure management products. We simplify, automate and secure more than 10 million Active Directory, Exchange, SharePoint and Windows server users and allow you to simplify the management of your Unix and Linux environment through integration with existing Microsoft technologies. Through a deep expertise in IT operations and a continued focus on what works best, Quest helps you meet higher expectations for enterprise IT.

### Active Directory

**Active Administrator:** Enables administrators to quickly recover problem objects, as well as view, audit and report on the ever-changing state of their Active Directory infrastructure. It also delivers Group Policy management.

**ActiveRoles AD LDS/ADAM:** The only comprehensive management solution for AD, AD LDS or both at the same time. ActiveRoles Server can be used to consolidate and centralize Active Directory and/or AD LDS management creating a single point of administration and change control across the enterprise for all Microsoft directory services.

**ActiveRoles Exchange Resource Forest Manager:** Allows you synchronize the provisioning between a User Account Forest and the Exchange Resource Forest as well as provide a single interface for user account management between these forests.

**ActiveRoles Quick Connect:** Allows ActiveRoles Server to initiate provisioning and de-provisioning from an Authoritative Data Source, thereby automatically controlling user access. Quick Connect can be leveraged to efficiently integrate with HR/ERP applications as well as connect to ILM 2007/MIIS and any connected system for an enterprise-wide provisioning solution.

**ActiveRoles Self-Service Manager:** Allows administrators to empower application and data owners to securely self-manage their resource access groups, while remaining in compliance.

**ActiveRoles Server:** Offers a practical approach to automated AD and AD LDS (formerly ADAM) user provisioning as well as strict role-based administration and administrative policy enforcement for maximum security and efficiency.

**Collaboration Services:** This solution displays free-busy information and global address lists to your existing Outlook client. Collaboration Services provide secure synchronization and administrative control.

**Domain Migration Wizard™:** Enables migration to Active Directory, consolidation of Windows NT domains and splits Windows NT domains.

**Group Policy Extensions for Desktops:** Allows your administrators and security officers to enforce desktop end-point security through Group Policy.

**Group Policy Manager:** Offers Group Policy Object (GPO) management capabilities so organizations can efficiently deploy and manage GPOs for better security and control of their IT infrastructure.

**InTrust:** Collects, stores, reports and alerts on event data from heterogeneous systems and controls changes to Exchange AD and GPOs.

**InTrust Plug-in for File Access:** Provides real-time, detailed tracking of all user and administrator activity as it relates to file/object access.

**InTrust Plug-in for Active Directory:** Provides real-time, detailed tracking of all changes to AD and Group Policy settings. By providing efficient collection and storage of audit data, this solution enables you to react to policy violations and unwanted changes to critical objects.

**InTrust Plug-in for File Access:** Provides real-time, detailed tracking of all user and administrator activity as it relates to file/object access.

**Knowledge Portal:** Provides a consolidated view of your IT compliance and framework status. It delivers scheduled and ad-hoc reporting, enabling complete business views into IT both at summary and granular levels.

**Migration Manager for Active Directory:** Simplifies Active Directory-to-Active Directory migration and supports Active Directory redesign.

**Password Manager:** Allows your end users to reset forgotten passwords securely, so you can implement stronger password policies while reducing the help desk load.

**Recovery Manager for Active Directory:** Provides granular recovery from inadvertent deletions or modifications to Active Directory data in minutes, not hours.

**Recovery Manager for Active Directory Forest Edition:** Simplifies the requirements for recovering the entire forest in the event of forest-wide corruption.

**Reporter:** Enables you to collect, report on and resolve issues in AD and Windows-based configurations, which is essential for change auditing, Windows security assessments, or AD pre- and post-migration analyses.

**Spotlight® on Active Directory:** Provides real-time diagnosis, troubleshooting and resolution of all problems related to Active Directory replication, performance and availability.

### **Managing Identities and Access**

**Defender:** A standards-based, two-factor authentication solution that supports many token types from multiple vendors and offers a cost-effective alternative to more expensive, proprietary, and support-intensive solutions.

**Enterprise Single Sign On (ESSO):** Leverages the power of Active Directory for universal single sign-on that strengthens security, improves end-user and IT efficiency, and satisfies compliance demands.

**Privilege Manager for Unix:** A policy-based access control system that allows you to avoid issuing the root password for common tasks.

**SafeKeeping:** A web-based virtual appliance that allows for the secure storage, retrieval and changing of administrator passwords.

**Vintela® Authentication Services:** Allows Unix and Linux systems and applications to leverage AD's capabilities, including Group Policy.

**Vintela® Single Sign-on for Java:** Provides a unified platform for identity management of Java and J2EE applications and services from the same Active Directory infrastructure used to provide single sign-on for Windows resources.

**Webthority:** Provides secure access to critical web resources while protecting systems from direct exposure. Authentication and authorization are based on Active Directory (or any directory) and group memberships.

## Unified Communications

**Archive Manager:** Makes e-mail a true asset for your organization by capturing, indexing, and storing messaging data for mailbox management, compliance, and knowledge sharing.

**Archive Management Suite:** Helps you understand Exchange usage, consolidate mailbox archives for greater security and capture e-mail at an organizational level. This reduces the risk of non-compliance and allows you to quickly discover and recover critical information.

**Exchange Migration Wizard:** Migrates your environment directly to Exchange 2003/2007 with true coexistence through synchronization and ZeroIMPACT to end users.

**GroupWise Migrator for Exchange:** Enables you to migrate from GroupWise to Exchange while preserving important organizational information and minimizing impact to users.

**InTrust Plug-in for Exchange:** Provides real-time, detailed tracking of all user activity, non-owner access, as well as auditing of configuration changes and permissions to Exchange mailboxes and servers.

**MessageStats™:** Empowers executive management, IT managers and Exchange administrators to perform business-critical analysis and reporting on Exchange.

**Migration Manager for Exchange:** Provides comprehensive seamless inter-organization migrations from Exchange 2000/2003.

**Migration Suite for Exchange:** Provides a ZeroIMPACT solution for planning and executing your migration projects to Exchange 2000/2003 from Exchange 5.5/2000/2003.

**Notes Migrator for Exchange:** Enables you to migrate directly from Lotus Notes to Exchange with robust project management and reporting tools, and minimal impact to users.

**Recovery Manager for Exchange:** Rapidly and efficiently discovers and recovers business-critical Exchange data to aid with electronic investigations.

**Spotlight on Exchange:** Provides real-time diagnostics, troubleshooting and problem resolution for Exchange.

## Windows Data Management

**Storage Consolidator for Windows:** Automates the online migration of file server data with security settings intact, as a part of a server consolidation project.

**Storage Manager for Windows:** Enables storage administrators to perform intelligent assessment and automate crucial ongoing management tasks to ensure an optimized Windows storage network.

## Systems Center

With a comprehensive set of solutions that extend the powerful capabilities of the Microsoft System Center family to heterogeneous environments, Quest enables System Center to be the single, end-to-end platform for managing desktops, servers, and devices in both physical and virtual environments.

- Achieve enterprise-wide monitoring and diagnostics with System Center Operations Manager 2007
- Manage change and configuration of your servers, desktops, applications and devices across the enterprise with System Center Configuration Manager 2007

- Ensure your critical business information is protected and ready for restore 24 X 7 with the backup and recovery capabilities of System Center Data Protection Manager 2007
- Reduce the cost and complexity of managing Windows desktops and applications with System Center Virtual Machine Manager 2007

Visit [www.quest.com/system-center](http://www.quest.com/system-center) for more information.

## SharePoint

**Development Studio for SharePoint:** Enables the rapid development of custom applications in SharePoint. It allows you to fully leverage SharePoint's native capabilities without custom coding, reducing the time and cost to build applications by up to 80 percent.

**File Migrator for SharePoint:** Enables you to migrate content in file shares to SharePoint 2007.

**Recovery Manager for SharePoint:** A scalable, enterprise solution for item-level SharePoint recovery. With extensive granular search, convenient previews and rapid restores of individual documents or entire backups, you save valuable time and money. You also gain peace of mind that your critical business information is preserved no matter what happens.

**Notes Migrator for SharePoint:** This is a cost-effective tool for migrating Notes, QuickPlace and Domino.Doc application content to SharePoint.

**Public Folder Migrator for SharePoint:** This tool allows you to easily perform bulk migrations of Exchange Public Folder content to SharePoint and consolidate collaboration platforms for easier management.

**Recovery Manager for SharePoint:** This is a scalable, enterprise solution for item-level SharePoint recovery. With extensive granular search, convenient previews and rapid restores of individual documents or entire backups, you save valuable time and money. You also gain peace of mind that your critical business information is preserved no matter what happens.

**Site Administrator for SharePoint:** provides tools for understanding and managing your entire SharePoint environment, including all SharePoint servers, site collections and sites. Leverage more than 30 out-of-the-box reports, build custom reports and set built-in global policy settings to reduce risks and gain control of SharePoint 2003 and 2007.

## About Quest Software, Inc.

Quest Software, Inc, a leading enterprise systems management vendor, delivers innovative products that help organizations get more performance and productivity from their applications, databases, Windows infrastructure and virtual environments. Through a deep expertise in IT operations and a continued focus on what works best, Quest helps more than 90,000 customers worldwide meet higher expectations for enterprise IT. Quest provides customers with client management as well as server and desktop virtualization solutions through its subsidiaries, ScriptLogic, Vizioncore and Provision Networks. Quest Software can be found in offices around the globe and at [www.quest.com](http://www.quest.com).
