

Quest Software Windows Management Readiness Matrix

Simplified Windows management starts with Quest Software. Trust the experts at Quest – two-time winner of Microsoft’s Global ISV Partner of the Year and Advanced Infrastructure Solutions Partner of the Year – to help your IT organization reduce cost, complexity and risk in your Microsoft Windows-based infrastructure. Below we have listed our Quest Windows management solutions and indicated their ability to support the newest Microsoft® releases.

Storage Suite for Windows	6.5								Unsupported	Supported ²	Supported ²	Supported	Supported	Supported ²	Supported ²		Supported ³		
Webthority	6.5	Unsupported							Supported	Supported			Supported	Supported	Supported				

1. SQL - 64-bit support is only available if the SQL Server Instance is located on a remote server. If it is located on the Console machine, 32-bit is only supported
 Target Servers - 64-bit target servers are supported. Windows Server 2008 target servers are supported.
 Workstation Migration - Vista workstation migration is supported.

Console - Not supported on Windows Server 2008, Windows Vista, or 64-bit platforms due to limitations in the Novell Client on those platforms.

2. Refers to agents deployed to these environments. Does not apply to product installation.
 3. Supports SQL Server 2000 and SQL Server 2005. Supports remote installations of 64-bit SQL Servers.

4. Support for Windows 2008 R2 will be provided when ChangeAuditor 5 is released (Q2), it's still TBD when the Plug-ins will support R2.

5. ActiveRoles Quick Connect for Base Systems.
 6. Console only.

Exchange Unified Communications

Product	Current Version	Exchange Server 2010	Office Communications Server 2007 R2	Lync Server 2010	BPOS - S (2007)	BPOS - D (2007)	Office 365	BPOS - D (2010)	64-Bit Support		Vista	Windows 7	Internet Explorer 8	Windows Server 2008	Windows Server 2008 R2	System Center	SQL Server 2008	SharePoint 2010	SharePoint 2010 SP1
